

# Tariff Enterprise App

Gain real-time visibility into tariff exposure, model true landed costs and margin impact, and conduct scenario planning to explore sourcing, pricing, and cost strategies. Empower your team to respond with speed, clarity, and confidence amid shifting trade dynamics.

## Business Challenges

1. Siloed data hinders cross-functional response to tariff shifts.
2. Manual tools miss true landed cost exposure, leading to inaccurate financial planning.
3. No SKU-level view of tariff risk or margin impact.
4. Scenario planning is non-existent, slow, or shallow.
5. Tariff shifts trigger reactive, costly decisions.
