

# Inventory Enterprise App

Gain a complete view of inventory to make better decisions and respond quickly to changes in demand and lead time. Empower users with recommendations to reduce waste, boost service levels, and reposition inventory by making expected outcomes like overstock, understock, or obsolete inventory clearly visible and actionable. Collaborate with cross-functional teams to reduce & monitor waste to achieve business objectives.

## Business Challenges

1. Inventory policies and lead times don't bend with the business cycle.
2. Demand uncertainty dictates inventory and ordering policies.
3. Revenue and cost impacts are not easy to see or model.
4. Inaccurate data disguises the truth and requires investigation.
5. Problems are buried within a mountain of data from multiple places.
