

Short! Sheet Manager Microapp

Gain visibility into production build readiness by monitoring component availability. Identify production part shortages and initiate timely resolutions to prevent delays. Enable manufacturing teams to maintain schedule adherence, optimize throughput, and ensure seamless coordination across supply chain and production operations.

Business Challenges

1. Siloed data reduces visibility.
2. Reactive problem solving to changing schedules and inventory levels.
3. Lack of tools to identify gaps and errors in data.

5-15%

Increase in throughput

10%-20%

Reduction in inventory

5%-20%

Improvement in on-time delivery
