TADA™

Transforming Supply Chains with **Digital Duplicate**®

Spend Enterprise App

Unify disconnected systems and unlock real-time intelligence across procurement. Harness advanced analytics to pinpoint cost drivers, strengthen compliance, and guide smarter decisions. Empower your team to cut costs, boost efficiency, and create lasting impact across the organization.

Business Challenges

1. Cost reduction opportunities are difficult to identify due to disconnected data and systems.
2. Manual data analysis is slow and error-prone.
3. Lack of real-time spend visibility hinders proactive budget management and compliance.
4. Talent wasted on manual analysis instead of strategic thinking.
5. Inconsistent data structure and quality across business functions lead to inaccurate insights.

Real-Time Data Integration • AI-Based Digital Assistant • TADA Shield

Parts Network • Supplier Network • Facility Network • Product Demand • Product Categories • Invoice / POs

Spend Management

Spend Classification • Data Governance • Price Variance Analysis • Spend Benchmarking • What-If Scenario Modeling • Cost Reduction Project Management

Data Validation & Resolution • Workgroups • Automated Workflows
